SUMMARY

M.Sc. Data Science graduate specializing in Generative AI, LLM-powered applications, RAG systems, and AI agents. Hands-on experience building end-to-end solutions using Python, FastAPI, LangChain, LangGraph, embeddings, and vector databases. Built multi-document research assistants and agentic applications with tool calling, conversational memory, external API integrations, and automated workflows. Strong interest in developing scalable AI products that solve real-world problems through intelligent automation and grounded LLM systems.

EDUCATION

M.Sc. Data Science, GITAM University, Visakhapatnam (2026) – CGPA: 7.78/10

B.Sc. Electronic and computer Science, M.V.R Degree College, Visakhapatnam (2024) – CGPA: 7.32/10

SKILLS

- **Programming Languages:** Python,OOPs
- **Backend Development:** FastAPI, REST APIs
- **Data Science & ML:** Pandas, NumPy, Scikit-learn, Matplotlib, PyTorch, TensorFlow
- **Databases:** PostgreSQL, SQLite, SQL
- **Generative AI & LLM**: Generative AI, RAG, Prompt Engineering, Embeddings, Vector Search, Tool Calling, Agentic AI, Conversational AI
- **LLM & AI Frameworks:** LangChain, LangGraph, Hugging Face, Groq
- **AI & Agent Technologies:** MCP, API Integrations, External Tool Integration
- **Automation:** n8n, Make.com, Email Automation Workflows
- **Developer Tools:** Git, GitHub, Postman

PROJECTS:

Autonomous Research Chatbot with Daily Research Updates Link

- Built an end-to-end multi-document RAG system allowing users to upload and query 1–10 research documents with grounded, context-aware responses.
- Designed a RAG pipeline using all-MiniLM-L6-v2 embeddings, Chroma vector search, multi-query retrieval, document filtering, and cross-document chunk balancing to improve relevant context retrieval.
- Integrated Semantic Scholar, OpenAlex, CrossRef, and arXiv APIs for academic paper discovery, deduplication, caching, and topic-based research organization.
- Developed an automated AI research digest workflow that summarizes recent research using Groq and delivers personalized HTML email updates through Make.com and Gmail.

SkillMap Agent with Memory | AI Agent Link

- Built an AI-powered career intelligence agent using LangChain and LangGraph to analyze industry skill demand and identify relevant job opportunities.
- Implemented agentic tool calling with Tavily for real-time skill research and JSearch API for retrieving relevant job listings.
- Integrated Groq LLM with LangChain create_agent() to dynamically select tools, reason over results, and generate responses.
- Implemented conversational memory to maintain context across multi-turn conversations and support follow-up career queries.

EXTRACURRICULAR ACTIVITIES

- **WOW Vizag Hackathon**: Built AgriLoop (**4-person team**) in **20 hours**; shipped demo-ready marketplace MVP with **5 screens, 1 API and 100% on-time** milestones via roadmap and timeboxed execution
